

HOME SWEET HOME

This poor little worker bee has lost her way. She's been out and gotten nectar from almost 2500 flowers. She needs to take the nectar back to the hive to make honey. Honey bees are the only insects that create food for humans. Could you help her get back to her hive?

Did You Know?

Honey bees have 4 wings, 6 legs, and 5 eyes?

Did you know they lose their stinger when they sting, then they die?
